Technical Skills

Programming Languages	:	C, Python
Additional Tools	:	Excel, Git, GitHub, Video editing, Photoshop
Libraries/Framework	:	Matplotlib, Numpy, Pandas, Scikit-learn
Web Development	:	HTML, CSS, NextJs, JavaScript

Projects

Trevia – AI-Powered Smart Tourism Platform | Next.Js | GitHub Link

• Developed Trevia, an intelligent tourism web application designed to personalize and simplify travel planning through AI-driven recommendations and real-time data.

• Integrated external APIs to deliver dynamic suggestions on destinations, weather, local attractions, accommodations, and transport based on user preferences and location.

• Built an AI recommendation engine for customized travel itineraries, hidden gems, cultural experiences, and offbeat routes tailored to individual profiles.

• Enabled multilingual chatbot support for itinerary queries, emergency guidance, local tips, and travel assistance to improve accessibility and user engagement.

Telugu Movie Guessing Game | Python | GitHub Link

- Developed a **CLI-based Telugu movie guessing game** in **Python**, inspired by **Hangman**, where players guess movie names from partially hidden text.
- Added **multi-player support**, **cyclic turns**, **dynamic scoring**, and **real-time feedback** using the **difflib** module for guess similarity.
- Designed features like **letter-based hints**, **custom difficulty**, and a scoring system (+50 for correct, -5 for wrong, -10 per hint).
- Implemented **round-based control**, **final result declaration**, and a **modular code structure** using reusable functions like create_question, unlock, and similarity.

Voice-Controlled AI Assistant | *Python* | GitHub Link

- Developed an **AI voice assistant** using **speech_recognition** and **pyttsx3** for real-time voice input and speech output.
- Enabled tasks like **playing YouTube songs** (via **pywhatkit**), **checking weather** (OpenWeatherMap API), **telling jokes**, and sharing **quotes/facts**.
- Implemented **voice-controlled WhatsApp messaging** with **pyautogui**, including dynamic error handling and retry logic.
- Added **web automation** for opening sites like **YouTube**, **Gmail**, and **Google** using voice, with a **modular, expandable design** and **noise handling**.

Education

VNR Vignana Jyothi Institute of Engineering & Technology Hyderabad, Telangana
B.Tech in C.S.E (Hons.) (Spl. in Data Science) | 9.1 CGPA *Graduation Year: 2028*

Also pursuing Online Bs degree program in Data Science &Applications in IIT MADRAS

Viswasanthi E.M High School Vuyyuru, Andhra Pradesh
Intermediate (CBSE) - PCM — 91.8% *July 2024*

Matriculation (CBSE) - 95.6% *May 2022*
